Self-Evaluation Report (SER)

2025

1st-5th December 2025

Table of Contents

Appendices	1
Appendix 1.3. SWOT report (Strengths, Weaknesses, Opportunities, and Threats) for the Degree in Veterinary Medicine. ULPGC.	1
Appendix 2.1. Specific budget of FVULPGC.....	9
Appendix 3.1. Detailed curriculum	10
Appendix 3.2. A-EPT providers	11
Appendix 3.2. B-EPT providers by activity	12
Appendix 4.1. FVULPGC maps	13
FVULPGC Campus map	13
FVULPGC VTH map	14
FVULPGC VTF map.....	15
FVULPGC large animal isolation unit map	18
Gran Canaria slaughterhouse location and distance from the FVULPGC	19
Appendix 4.9. FVULPGC biosecurity manual – summary.....	20
Appendix 5.1. Number and type of different specimens and materials of animal origin by species.	22
Appendix 5.2. Average group size in clinical training over last academic years	25
Appendix 9.1. Current academic staff at the FVULPGC.....	26
Academic staff 2024-2025	26
Academic staff 2023-2024	27
Academic staff 2022-2023	28
Academic staff 2021-2022	29
PhD and post-doc students 2024-2025	30
PhD and post-doc students 2023-2024	31
PhD and post-doc students 2022-2023	32
PhD and post-doc students 2021-2022	33
Appendix 9.2.a. Support staff registered at the FVULPGC	34
Appendix 9.2.b. Support staff registered at the VTH.....	36
Appendix 10. List of indexed publication from FVULPGC staff from 2022 to 2024	37

Appendix 1.3. SWOT report (Strengths, Weaknesses, Opportunities, and Threats) for the Degree in Veterinary Medicine. ULPGC.

INFORME DAFO (Debilidades, Amenazas, Fortalezas y Oportunidades) DEL GRADO EN VETERINARIA. UNIVERSIDAD DE LAS PALMAS DE GRAN CANARIA

(aprobada en Comisión de Calidad. 18 de junio de 2025)

I. DEBILIDADES (D)

1. Financiación e infraestructuras

- Reducción general de recursos económicos y fuerte dependencia del reparto interno de fondos, agravada por la financiación autonómica estancada.
- Los altos costes de mantenimiento pueden afectar el desarrollo académico a medio plazo.
- Obsolescencia del equipamiento e infraestructuras, incluyendo deficiencias específicas en las salas de necropsia, que limitan la competitividad del centro.

2. Formación práctica

- Capacidad limitada para mantener vacas lecheras y caballos en la granja, por la escasez local de estas especies.
- Diversidad de especies complica la formación práctica.
- Dificultades para conseguir grandes animales para necropsias, por el bajo censo y problemas logísticos.
- Alto ratio estudiante/profesor en prácticas no clínicas.

3. Personal y recursos humanos

- Envejecimiento del personal docente y técnico, con necesidad de renovación generacional urgente.
- Falta de personal clínico con titulación europea en el HCV, y alta rotación de veterinarios, dificultando la estabilidad de los servicios.

www.fv.ulpgc.es

Facultad de Veterinaria
Campus Universitario de Arucas
35413 Arucas - Las Palmas

4. Insularidad y lejanía

- La ubicación insular encarece la vida estudiantil, limita el acceso a casos prácticos y dificulta la asistencia a eventos académicos presenciales.

II. AMENAZAS (A)

1. Entorno académico interno y externo

- El aumento de Facultades de Veterinaria en España genera mayor competencia por estudiantes, mientras la baja natalidad podría reducir las matrículas y bajar el nivel medio de acceso.
- El declive del sector ganadero y la reducción de subvenciones afectan las oportunidades laborales para los titulados.
- La complejidad en la gestión del Hospital Clínico Veterinario (HCV) limita su competitividad y su rol como centro de referencia.

2. Personal y recursos humanos

- El déficit de financiación regional dificulta la renovación generacional de personal docente e investigador (PDI) y técnico (PTGAS).
- Problemas para obtener visados afectan la incorporación de estudiantes internacionales fuera de la UE.

3. Formación práctica

- La nueva legislación española (RD 32/2021) limita las prácticas extracurriculares para estudiantes.
- Crecen las dificultades para aceptar estudiantes en formación práctica externa (FPE) debido a cuestiones de bienestar animal, bioseguridad, gestión de granjas y transporte.

III. FORTALEZAS (F)

1. Acreditaciones y calidad

La FVULPGC cuenta con acreditaciones nacionales e internacionales, con buena posición en rankings y alta demanda de estudiantes. Tiene implantado un sistema de garantía de calidad, basado en el análisis de resultados y mejora continua, con canales de comunicación eficaces.

2. Entorno académico interno y externo

Existe una relación cercana entre estudiantes y profesorado, con alta satisfacción y participación activa del alumnado en las comisiones. El campus, pequeño y cohesionado, favorece un ambiente familiar y un buen ratio profesor/alumno. La planificación docente incluye reuniones de coordinación anual. Hay convenios con instituciones públicas y privadas para prácticas y proyectos, incluyendo centros de fauna exótica y albergues. Se fomenta la movilidad internacional con apoyo institucional.

3. Infraestructuras y formación práctica

El centro dispone de instalaciones completas, incluyendo hospital veterinario y granja docente. Se organizan visitas a explotaciones ganaderas e industrias, y la cercanía con la ciudad facilita el acceso al campus. La proximidad a un albergue animal permite trabajar directamente con animales abandonados. La ULPGC mantiene un plan de renovación de equipamiento. Los estudiantes participan en actividades extracurriculares que fortalecen su formación, especialmente en especies exóticas. La biblioteca cuenta con recursos bibliográficos y digitales de calidad.

4. Personal y recursos humanos

El profesorado está altamente cualificado, siendo el mejor valorado de la ULPGC, con una mayoría de doctores e investigadores activos y reconocidos. Docentes asociados aportan experiencia práctica en áreas específicas. Existen grupos de investigación con participación en proyectos a todos los niveles. El servicio de apoyo al estudiante y el personal técnico cualificado contribuyen eficazmente a la docencia e investigación.

IV. OPORTUNIDADES (O)

1. Reputación y mejora del plan de estudios

- La veterinaria es una profesión demandada en España, con alta expectativa social en alimentos seguros y medicina veterinaria.
- La aplicación completa de la Directiva 55/2013 impulsará un plan de estudios de 360 ECTS, con más formación práctica y asignaturas optativas.
- Aumenta la conciencia social sobre salud animal, seguridad alimentaria, control de zoonosis y resistencias antimicrobianas, generando demanda de profesionales.
- El concepto “One Health” fortalece el rol veterinario en equipos multidisciplinares públicos y privados.
- El diseño participativo del nuevo plan de estudios permitirá adaptar la enseñanza a las necesidades sociales.
- La proximidad y vínculo con África atrae estudiantes de ese continente, manteniendo lazos que benefician a la facultad.

2. Formación práctica

- Se promueve la donación de cadáveres para prácticas en el HCV, con convenios activos para uso formativo.
- Sinergias con asociaciones profesionales, clínicas privadas y reservas de fauna salvaje fortalecen la formación práctica.
- El servicio de apoyo universitario es un recurso valioso para los estudiantes.

3. Transformación digital en los sistemas educativos

- Nuevos modelos de enseñanza digital superan limitaciones geográficas y mejoran la formación.
- Simuladores animales compensan la falta de algunas especies en la práctica.
- Las tecnologías facilitan reuniones y eventos telemáticos, aumentando la participación.

SWOT REPORT (Strengths, Weaknesses, Opportunities, and Threats) FOR THE DEGREE IN VETERINARY MEDICINE. UNIVERSITY OF LAS PALMAS DE GRAN CANARIA

(approved by the Quality Committee. June 18, 2025)

I. STRENGTHS (S)

1. Accreditations and Quality

The FVULPGC holds national and international accreditations, enjoys a strong ranking, and enjoys high student demand. It has implemented a quality assurance system based on results analysis and continuous improvement, with effective communication channels.

2. Internal and External Academic Environment

There is a close relationship between students and faculty, with high satisfaction and active student participation in committees. The small, cohesive campus fosters a family atmosphere and a good faculty/student ratio. Academic planning includes annual coordination meetings. There are agreements with public and private institutions for internships and projects, including exotic wildlife centers and shelters. International mobility is encouraged with institutional support.

3. Infrastructure and Practical Training

The center has complete facilities, including a veterinary hospital and a teaching farm. Visits to livestock farms and industries are organized, and the proximity to the city facilitates access to the campus. The proximity to an animal shelter allows for direct work with abandoned animals. The ULPGC maintains an equipment renewal plan. Students participate in extracurricular activities that strengthen their training, especially in exotic species. The library features quality bibliographic and digital resources.

4. Staff and Human Resources

The faculty is highly qualified, among the highest-rated at the ULPGC, with a majority of active and recognized PhDs and researchers. Associate professors provide practical experience in specific areas. There are research groups participating in projects at all levels. The student support service and qualified technical staff contribute effectively to teaching and research.

II. WEAKNESSES (W)

1. Funding and Infrastructure

- A general reduction in financial resources and a heavy reliance on internal distribution of funds, exacerbated by stagnant regional funding.
- High maintenance costs may affect academic development in the medium term.
- Obsolescence of equipment and infrastructure, including specific deficiencies in necropsy rooms, limit the center's competitiveness.

2. Practical Training

- Limited capacity to maintain dairy cows and horses on the farm due to the local scarcity of these species.
- Species diversity complicates practical training.

Difficulties in obtaining large animals for necropsies due to low population numbers and logistical challenges.

- High student-faculty ratios in non-clinical practices.

3. Staff and Human Resources

- Aging teaching and technical staff, with an urgent need for generational renewal.
- Lack of clinical staff with European qualifications in the HCV, and high turnover of veterinarians, hindering the stability of services.

4. Insularity and Remoteness

- The island's location makes student life more expensive, limits access to practical cases, and makes it difficult to attend in-person academic events.

III. OPPORTUNITIES (O)

1. Reputation and Curriculum Improvement

- Veterinary medicine is an in-demand profession in Spain, with high social expectations regarding safe food and veterinary medicine.
- The full implementation of Directive 55/2013 will promote a 360 ECTS curriculum, with more practical training and elective subjects.

- It increases social awareness about animal health, food safety, zoonotic control, and antimicrobial resistance, generating demand for professionals.
- The "One Health" concept strengthens the veterinary role in multidisciplinary public and private teams.
- The participatory design of the new curriculum will allow teaching to be adapted to social needs.
- The proximity and connection with Africa attracts students from that continent, maintaining ties that benefit the faculty.

2. Practical Training

- The donation of cadavers for internships at the HCV is promoted, with active agreements for training use.
- Synergies with professional associations, private clinics, and wildlife reserves strengthen practical training.
- The university support service is a valuable resource for students.

3. Digital Transformation in Education Systems

- New digital teaching models overcome geographical limitations and improve training.
- Animal simulators compensate for the lack of some species in practice.
- Technologies facilitate online meetings and events, increasing participation.

II. THREATS (T)

1. Internal and External Academic Environment

- The increase in Veterinary Faculties in Spain generates greater competition for students, while the low birth rate could reduce enrollment and lower the average admission rate.
- The decline in the livestock sector and the reduction in subsidies affect job opportunities for graduates.
- The complexity of managing the Veterinary Clinical Hospital (HCV) limits its competitiveness and its role as a reference center.

2. Personnel and Human Resources

- The regional funding gap hinders the generational renewal of teaching and research staff (Teaching and Research Staff) and technical staff (PTGAS).
- Problems obtaining visas affect the incorporation of international students from outside the EU.

Appendix 2.1. Specific budget of FVULPGC

<i>FVULPGC FUNDS</i>				
Specific FVULPGC revenues (€)

FVULPGC large animal isolation unit map

Appendix 4.9. FVULPGC biosecurity manual – summary

1. Purpose & Scope

The Biosecurity Manual of the FVULPGC establishes the safety framework for teaching, research, and clinical activities. Its aim is to identify, assess, manage, and communicate biological, physical, and chemical risks. The manual applies to all facilities of the Faculty and external sites used for academic purposes. Compliance is mandatory for all users: students, staff, researchers, visitors, and external collaborators.

2. Biological Hazards & Classification

Biological risks are classified according to Royal Decree 664/1997 into four groups based on infection risk. Patients and samples are labelled using a colour code system:

- Group 0–1 (Green): Low or minimal risk; non-infectious samples.
- Group 2 (Green): Moderate risk; e.g. FeLV, FIV, FIP, Aspergillosis.
- Group 3 (Yellow): Serious or zoonotic; e.g. Salmonella, MRSA, Leishmania, Giardia.
- Group 4 (Red): Severe, highly contagious or zoonotic; e.g. Rabies, Brucella, Leptospira, Parvovirus.

3. Physical Risks

Teaching and research activities may involve physical hazards: cuts, punctures, scratches from instruments; animal-related injuries (bites, kicks, scratches); falls, electrical hazards, cold/heat exposure, and radiation from diagnostic imaging equipment (X-rays, CT). Radiation use must follow the ULPGC Radiological Protection Service.

4. Chemical Risks

Chemical, pharmacological, and toxic products are widely used, including anaesthetics, chemotherapy drugs, acids, bases, and disinfectants. Laboratories must be equipped with eyewash stations, showers, and protective ventilation. All chemicals must be stored and handled according to labeling regulations.

5. User Regulations

All staff and students must wear visible ULPGC identification. Restricted areas are marked with yellow or red codes and require compliance with specific protocols. Clothing must follow a strict color code by facility:

- Laboratories: White coat or scrubs.
- Necropsy/Dissection: Green scrubs, apron, Wellington boots.
- Faculty Farm: Maroon scrubs/jumpsuit, boots.
- External Farms: Dark blue scrubs, steel toe boots for large animals.
- Clinical Hospital: Light/dark blue scrubs, closed shoes.
- Slaughterhouse: White coat, green (dirty) / maroon (clean) scrubs, boots.

General behaviour rules prohibit food, drinks, pets, smoking, jewellery, and loose hair. Nails must be kept short, wounds covered, and tattoos/piercings must not compromise hygiene or professionalism.

6. Good Practice Guidelines

Hand hygiene is the most critical biosecurity measure. Washing is required before and after patient contact, sample handling, eating, bathroom use, and at the beginning and end of activities. Sample reception must be conducted by authorized personnel, using proper risk coding. Waste disposal

follows ULPGC's Comprehensive Waste Management Plan (PIGRU). In case of accidents, users must notify Faculty administration and call 112.

Insurance: Students are generally covered by School Insurance (up to age 28). Additional 'Laude' insurance is available. For international internships, a European Health Insurance Card or private insurance is required.

7. References

The manual draws on international and national references including the CDC Biosecurity in Microbiological and Biomedical Laboratories (BMBL), OIE guidelines, JAVMA studies on infection control, and Royal Decree 664/1997.

8. Annex – Facility Protocols

Each facility must prepare its own biosecurity protocol complementing the manual. Protocols must include: identification of risks, patient/sample classification, access control, clothing and PPE rules, equipment use, waste management, accident procedures, staff training and audits, and specific good practice guides displayed visibly.

Investigation of Carriers of Salmonella and Other Hydrogen Sulphide-Positive Bacteria in the Digestive Content of Fish from the Atlantic Area of Macaronesia: A Comparative Study of Identification by API Gallery and MALDI-TOF MS

(2024) Animals, 14 (22), art. no. 3247

DOI: 10.3390/ani14223247

DOCUMENT TYPE: Article

OPEN ACCESS

- 5) L., Sacarrão-Birrento, Laura, L.J.S., Harrison, Leslie J.S., R., Pienaar, Ronel, F.N., Toka, Felix Ngosa, J.F.J., Torres-Acosta, J. F. J., V.L.R., Vilela, Vinicius Longo Ribeiro, L.E., Hernández-Castellano, Lorenzo E., C.M., Arriaga-Jordán, Carlos Manuel, Y.A., Soltan, Yosra Ahmed, R., Ungerfeld, Rodolfo

Challenges for Animal Health and Production in the Tropics and Mediterranean for the next 55 years
(2024) Tropical Animal Health and Production, 56 (8), art. no. 381
DOI: 10.1007/s11250-024-04212-7
DOCUMENT TYPE: Article
OPEN ACCESS
- 6) S., Falcón-Cordón, Soraya, Y., Falcón-Cordón, Yaiza, S.N., García-Rodríguez, Sara Nieves, N., Costa-Rodríguez, Noelia, D.J., Vera-Rodríguez, Daniel Julio, J.A., Montoya-Alonso, José Alberto, E., Carretón, Elena

Radiological Evaluation of Vascular Structures in Cats Infected with Immature Worms of *Dirofilaria immitis*
(2024) Animals, 14 (20), art. no. 2943
DOI: 10.3390/ani14202943
DOCUMENT TYPE: Article
OPEN ACCESS
- 7) A.I., Quintana-Mayor, Agustina Isabel, E., Carretón, Elena, J.A., Montoya-Alonso, José Alberto

Efficacy of Sustained-Release Formulation of Moxidectin (Guardian SR) in Preventing Heartworm Infection over 18 Months in Dogs Living in a Hyperendemic Area
(2024) Animals, 14 (20), art. no. 3001
DOI: 10.3390/ani14203001
DOCUMENT TYPE: Article
OPEN ACCESS
- 8) A., Morales-Espino, Alejandro, M., Fumero-Hernández, Marcos, F., Suárez-Cabrera, Francisco, M.Ó., Encinosa Quintana, Mario Ó., M.M., Conde-Felipe, Magnolia Maria, J.R., Jaber, José Raduán

Computed Tomography Anatomy of the Juvenile Cory's Shearwater (*Calonectris borealis*) Normal Nasal Cavity
(2024) Animals, 14 (20), art. no. 3015
DOI: 10.3390/ani14203015
DOCUMENT TYPE: Article
OPEN ACCESS
- 9) P.A., Santana, Paula A., J.C., Forero, Juan Carlos, F., Guzmán, Fanny, S., Gaete, Sandra, F., Acosta, F., L.A., Mercado, Luis A., C.A., A´lvarez, Claudio Andrés

Detection and Localization of IL-8 and CXCR1 in Rainbow Trout Larvae in Response to *Pseudomonas aeruginosa* Lipopolysaccharide

(2024) *Animals*, 14 (19), art. no. 2878

DOI: 10.3390/ani14192878

DOCUMENT TYPE: Article

OPEN ACCESS

- 10) U., Sivagurunathan, Ulaganathan, M.S., Izquierdo, Marisol Soledad, Y., Tseng, Yiyen, A.J.P., Philip, Antony Jesu Prabhu, M.J., Zamorano, María Jesús, L.E., Robaina, Lidia Ester, D., Domínguez, David

Effects of the Interaction between Dietary Vitamin D3 and Vitamin K3 on Growth, Skeletal Anomalies, and Expression of Bone and Calcium Metabolism-Related Genes in Juvenile Gilthead Seabream (*Sparus aurata*)

(2024) *Animals*, 14 (19), art. no. 2808

DOI: 10.3390/ani14192808

DOCUMENT TYPE: Article

OPEN ACCESS

- 11) R., Rodríguez, Raquel, D., Alemán, Dácil, M., Batista, Miguel, C., Moreno, Carla, M., Santana, Melania, K., Iusupova, Kseniia, D., Álamo, Desirée

Maternal and fetal factors for determining the cesarean section type (scheduled/emergency) in bitches

(2024) *Theriogenology*, 227, pp. 144 - 150

DOI: 10.1016/j.theriogenology.2024.07.020

DOCUMENT TYPE: Article

OPEN ACCESS
